Mission

The Supervision and Training Section (STS) is dedicated to those interested or engaged in training or supervising mental health service providers, including students, professional therapists-counselors, psychologists, and clinical supervisors.

Specifically, the Section strives to promote multi-culturally sensitive research, teaching, practice, as well as public interest in therapist training, clinical supervision, and supervisor training. We have a strong emphasis on student and supervisee involvement.

The Section also provides resources and forums to discuss and address practical issues arising from training and supervision (e.g., the STS listserv).

Vision

Set Goals 2018-2019

- ▶ Fulfill Student Task Force Goals
- ▶ Develop strategies for facilitating student-to-ECP transition (Heidi H/Heidi Z)
 - ▶ Brainstorm section activities and initiatives specifically geared toward ECPs and facilitating the student-to-ECP transition. ECPs are often both supervisors and supervisees (e.g., post-docs), so how can we support them in these roles?
